ADVANCED ARRESTING GEAR

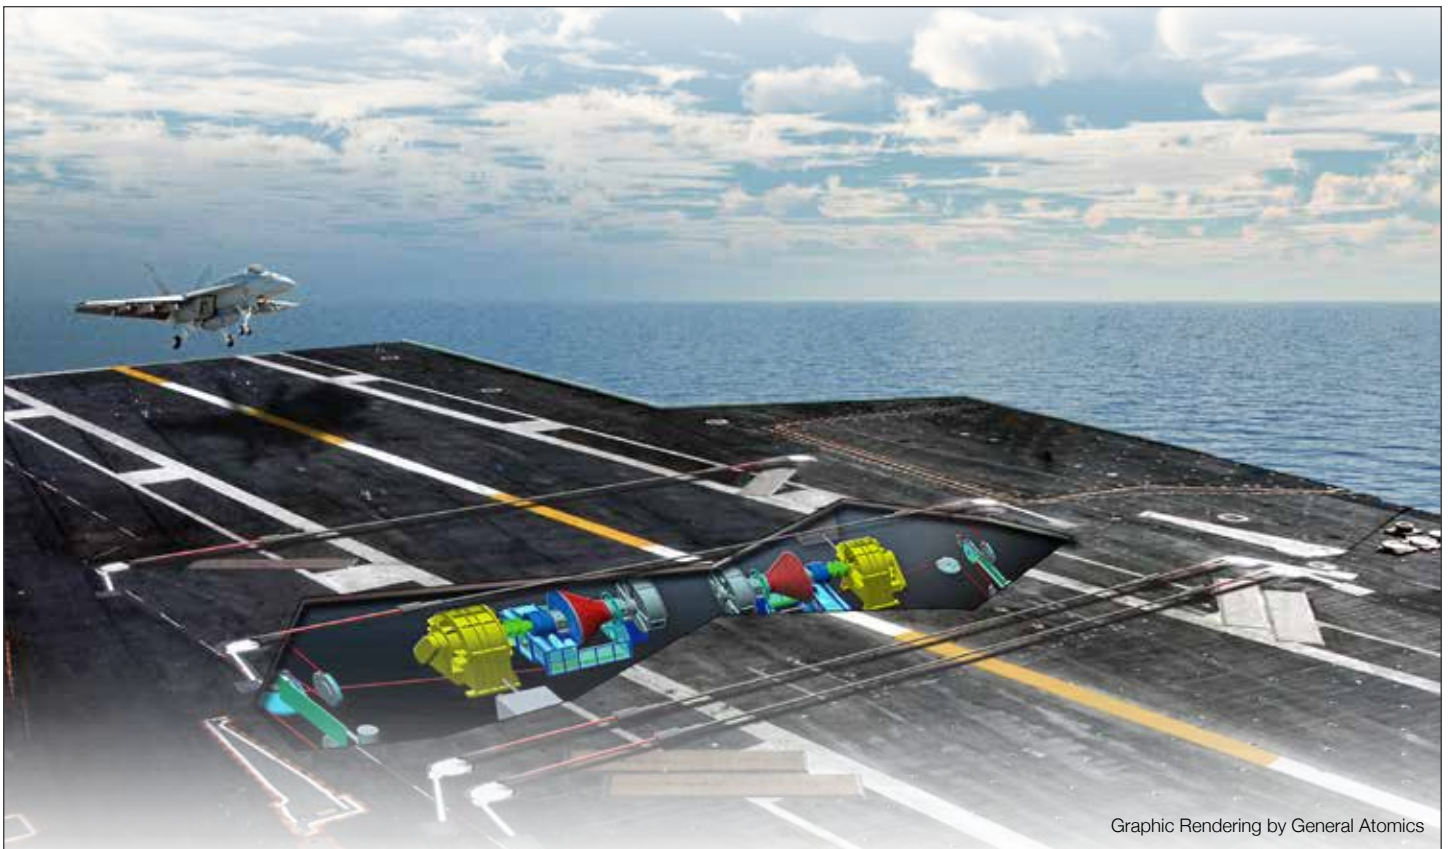

LAUNCHING A NEW ERA IN NAVAL AVIATION

Hardware installation underway at the Runway Arrested Landing Site (RALS) in Lakehurst, N.J.

## THE SYSTEM PROVIDES SIGNIFICANT BENEFITS OVER CURRENT RECOVERY SYSTEMS:

- Operational capability to recover current and future aircraft
- Compatible with Nimitz-class and Ford-class carriers
- Higher system availability due to increased reliability and improved maintainability
- Self-diagnosis and maintenance alerts
- Reduced manning and life-cycle costs
