

April 2026

Valued General Atomics (GA) Supplier,

The Department of Defense (DoD) Chief Information Officer (CIO) has issued a memorandum to Senior Pentagon Leadership, Commanders of the Combatant Command, and Defense Agency and DOD Field Activity Directors, titled, "Removal of Anthropic, PBC Products in DoW Systems". This memorandum identifies Anthropic (including Claude) products as an unacceptable supply chain risk requiring removal from DoD systems within 180 days. This restriction applies to all Defense Industrial Base (DIB) contracts.

Suppliers to GA should review the memorandum, review all Orders issued by GA, and take appropriate measures, as needed, to comply. GA may reach out to confirm your compliance. Please respond quickly and accurately to any inquiry.

We thank you for your continued support.

General Atomics
